POWERFUL SOLUTIONS
AGAINST CORROSION

INDUSTRIAL LININGS • ENGINEERING • MANUFACTURING • ON-SITE APPLICATIONS

Long-Lasting Protection for Industrial Surfaces.

Ülker Linings provides engineering-driven, high-performance lining and coating solutions for industrial facilities and equipment.

ABOUT
ÜLKER LININGS

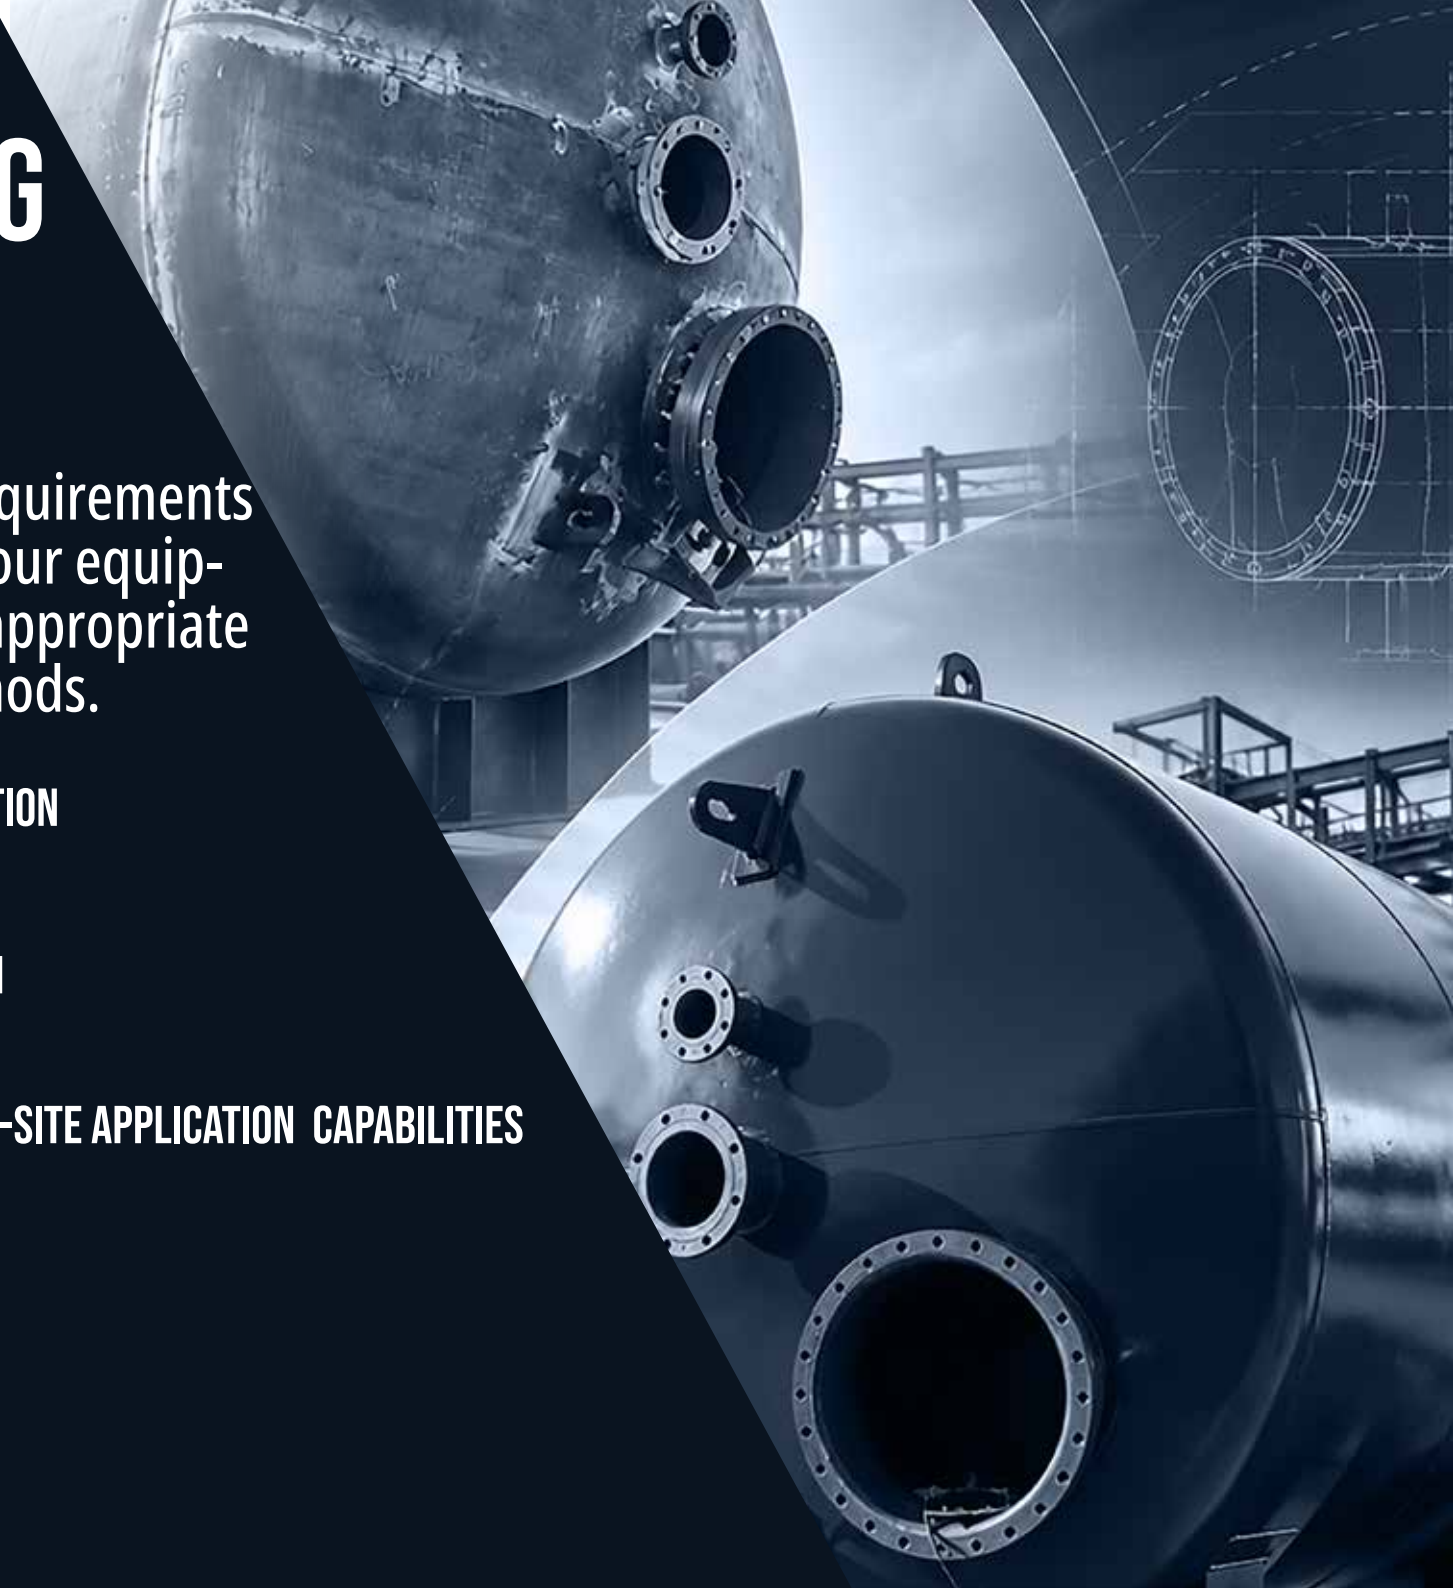

We provide long-lasting, sustainable, and reliable solutions against corrosion and wear in industrial facilities and equipment.

OUR ENGINERING APPROACH

We analyze your application requirements and extend the service life of your equipment through the selection of appropriate materials and application methods.

- ON-SITE ASSESSMENT AND INSPECTION
- APPROPRIATE MATERIAL SELECTION
- IN-HOUSE MANUFACTURING AND ON-SITE APPLICATION CAPABILITIES
- QUALITY CONTROL
- ON-TIME DELIVERY

CORROSION IS MORE THAN JUST A SURFACE PROBLEM.

Corrosion shortens equipment service life, increases maintenance costs, and causes production downtime.
We minimize these risks through effective lining and coating solutions.

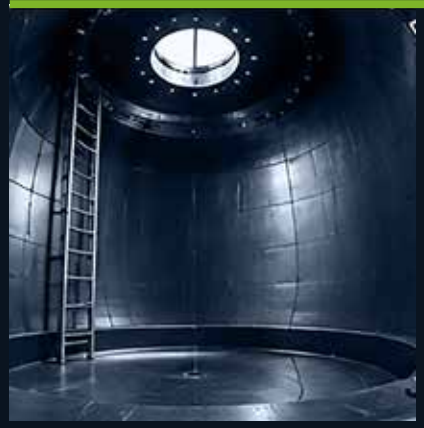

- PRODUCTION LOSS
- HIGH MAINTENANCE COSTS
- SAFETY RISKS
- ENVIRONMENTAL IMPACT

RUBBER LINING SOLUTIONS

Our rubber lining solutions protect equipment against abrasion, corrosion, and chemical exposure, extending service life while reducing downtime and maintenance costs.

1.TANKS AND VESSELS

2. PIPES AND ELBOWS

3. PUMP AND FAN HOUSINGS

4. PULLEY LAGGING

5. ON-SITE APPLICATIONS

SURFACE PREPARATION AND VULCANIZATION SOLUTIONS

01 ABRASIVE BLASTING AND SURFACE PREPARATION (SA 2½)

02 PRIMER / ADHESIVE APPLICATION

03 HOT VULCANIZATION / AUTOCLAVE

04 COLD-BONDING SYSTEMS AND SELF-VULCANIZING RUBBER COMPOUNDS

05 FINAL INSPECTION AND QUALITY ASSURANCE
(SPARK TESTING, THICKNESS TESTING, HARDNESS TESTING)

MATERIALS AND SYSTEMS

RUBBER LINING SOLUTIONS

We offer soft, semi-hard, and hard rubber options tailored to specific process requirements.

NR • SBR • BR/SBR • BIIR • CR • Ebonite

PRIMERS AND ADHESIVES

SOAD 100 PR — Grey Primer

SOAD 200 PR — Black Primer

SOAD 100 AD — Hot-Bonding Adhesive

SOAD 200 AD — Cold-Bonding Adhesive

REPAIR AND MAINTENANCE SOLUTIONS

SOFIX 100 EB —Ebonite Repair Compound

GRP/ FRP LINING

We provide Glass Reinforced Plastic (GRP/FRP) lining solutions for industrial applications requiring chemical resistance, corrosion protection, and leak-tight performance.

APPLICATION AREAS

- Tanks and Vessels
- Stacks and Ducts
- Pipelines
- Process Equipment

SiC REINFORCED SYSTEMS

We provide maximum resistance to severe abrasion and erosion through silicon carbide (SiC)-reinforced coating systems.

ON-SITE LINING AND FIELD APPLICATIONS

At Ülker Linings, we provide on-site lining services for tanks, pipelines, and process equipment that are difficult to dismantle or transport, or cannot be removed from industrial facilities.

On-Site Applications

Expert Team

Maintenance and Repair

APPLICATION AREAS

Tanks and Vessels

Pipes and Elbows

Pump and Fan Housings

Process Equipment

Custom Components

Conveyor Pulleys

RUBBER SHEET MANUFACTURING AND LINING

We manufacture high-performance rubber sheets for a wide range of industrial applications using our specially developed formulations and export them to numerous countries worldwide.

OUR PRODUCTION RANGE

NR • SBR • BIIR • CR

RUBBER SHEET TYPES

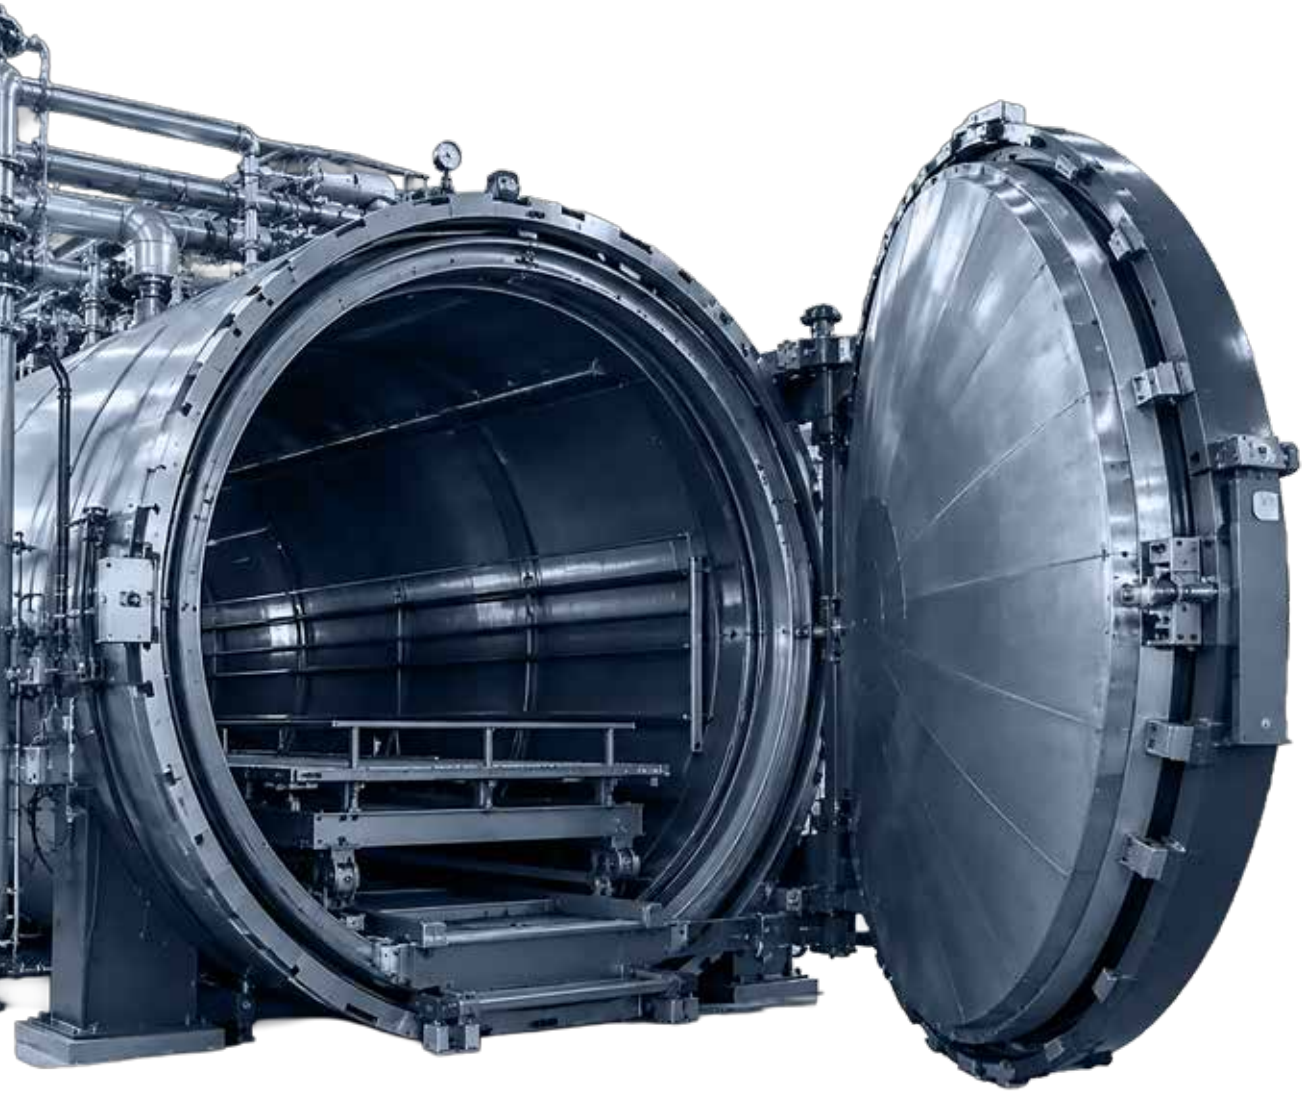

Soft, Semi-Hard, and Hard Rubber Sheets

Abrasion-Resistant Rubber Sheets

Chemical-Resistant Rubber Sheets

MANUFACTURING INFRASTRUCTURE AND APPLICATION CAPABILITIES

TECHNICAL SERVICE SUPPORT

Our experienced technical team provides support tailored to your requirements before, during, and after the application process.

AUTOCLAVE VULCANIZATION

By vulcanizing rubber linings under controlled temperature and pressure conditions, we ensure strong adhesion and durable lining performance.

RUBBER SHEET CALENDERING

Rubber compounds are calendered into smooth, uniform sheets with controlled thickness and width to meet application requirements.

ABRASIVE BLASTING & SURFACE PREPARATION

Surfaces are abrasive-blasted to achieve the required profile for proper lining application.

RUBBER COMPOUND PREPARATION SYSTEMS

Rubber compounds are homogeneously prepared using specialized formulations and rubber mixing equipment to meet specific process conditions and application requirements.

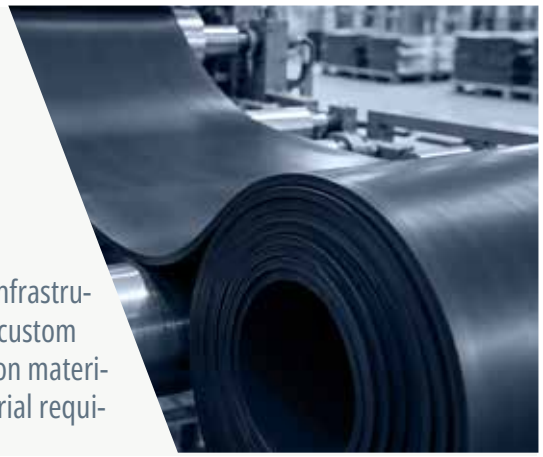

ON-SITE STEAM VULCANIZATION

Using portable steam generator systems, we provide solutions for the on-site vulcanization of rubber linings under suitable equipment and field conditions.

PRODUCTION CAPACITY

With our modern manufacturing infrastructure, we produce rubber sheets, custom components, and lining preparation materials to meet a wide range of industrial requirements.

ON-SITE APPLICATION TEAMS

Our experienced field teams provide on-site rubber lining, maintenance, and repair services at industrial facilities.

QUALITY-FOCUSED PROCESS

From surface preparation to final inspection, we prioritize lining integrity and quality standards throughout every stage of the application process, delivering durable and reliable solutions.

INDUSTRIES WE SERVE

At Ülker Linings, we provide durable and long-lasting lining solutions tailored to the requirements of various industrial sectors, offering protection against abrasion, corrosion, and chemical exposure.

01

CHEMICAL AND PETROCHEMICAL INDUSTRIES

02

POWER GENERATION PLANTS

03

WATER AND
WASTEWATER TREATMENT

04

CEMENT AND
AGGREGATES

05

MINING AND MINERAL
PROCESSING

06

FERTILIZER
PRODUCTION FACILITIES

07

TANK AND PROCESS
EQUIPMENT
MANUFACTURERS

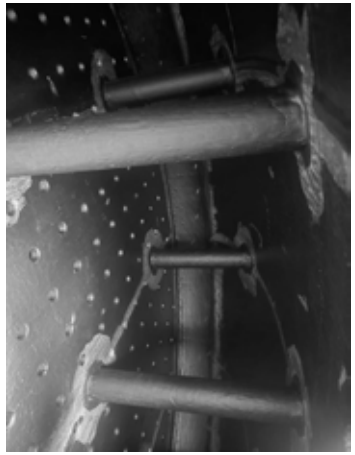

08

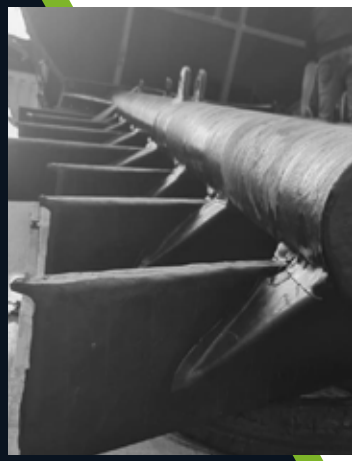

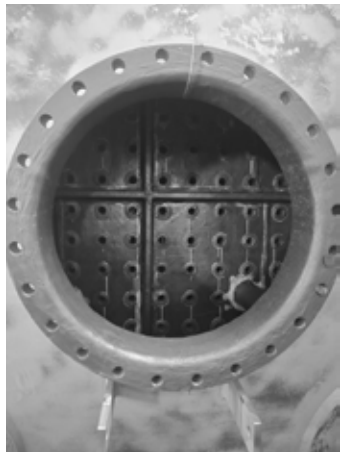

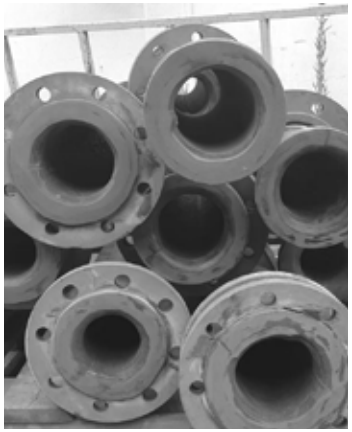

PULP AND
PAPER INDUSTRY

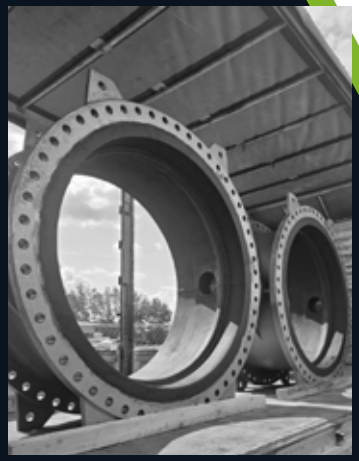

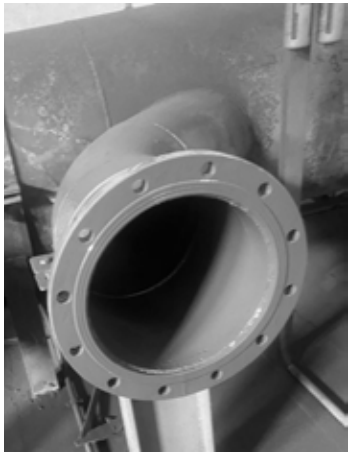

OUR APPLICATION PORTFOLIO

A selection of projects completed across various industrial facilities and equipment. In every project, we aim to deliver long-lasting protection through customized solutions and our extensive application expertise.
